**Subject:** Update COVID Tustumena

Vessel Crews,

I am corresponding to let all vessel crews know that after consultation with State epidemiology that, at this point in time, the 20 Tustumena crew members who departed the Tustumena in Homer on June 2, are not considered to be close contacts to the person aboard Tustumena who was determined to be COVID positive in Dutch Harbor. The AMHS has notified those employees per guidance received, and they are not restricted regards vessel work assignments.

Thank you,

Captain Falvey
